

Dillon Speanburgh is an 11 year old member of the Hoosic Valley Community who currently is in the 7th Grade. In May 2019 Dillon was diagnosed with JPA (Juvenile Pilocytic Astrocytoma) which is a rare childhood brain tumor. Dillon had surgery this spring to remove 80% of the tumor. Dillon still goes through regular testing having MRI's and blood work and Doctor visits regularly to monitor the tumor and ensure the tumor stays stable. Dillon's condition is now under "wait and watch" with new medical testing and expense regularly. Please support our event to support this amazing son, brother and friend along with his family!
